

Merlinus Anglicus Junior:

O R, T H E
STARRY MESSENGER

For the YEAR of our Redemption, 1735.

Being the Third from

Bissextile or Leap-Year.

Wherein is contained,

- I. Astronomical, Astrological, and Meteorological Observations,
- II. The State of the Year deduced according to Art. from Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Seven Planets.
- III. The Rising, Southing and Setting of the Moon, and High Water at *London Bridge*.
- IV. Tables of the Rising, Southing and Setting of the Seven Stars, and other fixed Stars of Note: A perpetual Table of the Rising and Setting of the Sun, beginning and ending of Twilight, and Length of the Day and Night, to every fifth Day throughout the Year; with many other Tables pertinent for such a Work, all Accommodated to the Meridian of LONDON, whose Latitude is 51 Degrees, 32 Minutes North, but will serve for any Part of *Great-Britain* or *Ireland*. The like not Extant.

By **HENRY COLEY**, Student in the
Mathematicks, and the Celestial Science.

I will behold the Heavens, even the Works of thy Fingers, the Moon and Stars which thou hast ordain'd. Psal. viii.

LONDON: Printed by **J. READ** for the
COMPANY of STATIONERS

JANUARY hath XXXI Days.

Prognostications of the Weather by the Winds.
 The Winds are the Cause of the most sudden and extraordinary Alterations of the Gravity of the Air; the Nature of the Winds is such, that by Experience we have of them we may thence predict (very near) the Weather that will ensue for two or three Days after.

We are now under the Influence of the Winter Quarter which commenc'd the 10th of December last, near Midnight, which as we have already observed, tend more to Consultation than Action. Spain is involved in great Difficulties, and many secret Intrigues and insincere Practices, appear in their Court and Councils, great Clashings and Contradictions among their great Men, and Differences and Disagreements among the common People, which soon brings on some unexpected Revolution.

FEBRUARY hath XXVIII Days.

We know (for Example) in this Climate, that a South Wind generally brings Rain, and a West Wind yet more, that the North Wind brings fair Weather, as well as the East Wind, which does not last so long as the former, therefore the N. E. and S. W. Winds are what I shall insist upon at present.

MARCH hath XXXI Day .

Is has been an Obiervation made by those that have been very curious Observers of the Weather for many Years, that in eight Years Time is as much South and West Wind, as North and East Wind, and consequently as many wet Years as dry Years, within that Space of Time.

The several
 Quintile Aspects
 of ♄ with the ☉.
 ♀ and ♂ in this
 Month denotes
 the dissolving of
 Friendships and
 Societies. The
 Sign in which ♄
 is so afflicted is
 ♋, the Ascend-
 ant of some Nor-
 thern Nations,
 which are like
 to undergo great
 Sorrows; and
 that from the Ty-
 ranny of some
 Prince or Princes
 these Aspects,
 consider'd with
 the aforesaid ♂
 of ♋ and ♂ will
 stir up and
 foment many
 Strifes, Troubles
 and intestine
 Controversies.

APRIL hath XXX Days,

A Rule to know when the Wind will be two or three Months together in one Point of the Compass.

When the Winds turns to the North-East Point, and continues there 3 Days without Rain, and turns not Southward the 3d Day, it will remain there 8 or 9 Days without Rain, and then turn into the South.

APRIL, 1735.

Last Quarter, the 4th Day, at 5 in the Morn.
 New Moon, the 11th Day, at 11 at Night.
 First Quarter, the 18th Day, at 9 at Night.
 Full Moon, the 25th Day, at Midnight.
 Jupiter rises the 12th Day at 1 in the Morning;
 and Venus sets between 9 and 10 at Night.

M	D.	Miles & fers.	Moon South	Lunar Aspects.						Astronomical Observations.
				☉	☿	♄	♊	♋	♌	
1	12	12	8	3M47	△					This Month produces some hopes of Unity in great Councils, or a better Understanding than formerly, the ☉ ☿ ☿ and ♋ at the Beginning, and of the ☉ and ☿ at the End, will for the present somewhat moderate the Male Influence of the late ☉ of ☿ and ☿, and put a better Countenance on Affairs in the North. It will be well if it continue; but the good Aspects of inferior Planets seldom fixeth Matters or Things to a long Continuance.

M A Y hath XXXI Days.

If the Wind turn out of the South to the North-East again, and continue in that Point without Rain, for 3 Days, and turn nor S with the 3d Day, nor rain the 4th Day, it is like to continue North-East for 2 or 3 Months. The Winds will finish these Turns toward the North in 3 Weeks Time.

August hath xxxi Days.

I mention not the East or West Winds, because the Rain usually comes from the South, or in the Shifting of the Wind from the South to the North. If it be fair Weather out of the South for a Week together (which is not usual) it is like to be a great Drought, if it has been long Rain from the South before.

C 4.

September hath xxx Days.

The Wind usually turns from the North to the South quietly without Rain, but comes back again into the North with great Strength and Rain. The greatest Winds which blow down Houses, &c. come by the Turning of the Wind out of the South by the West to the N. which drives away Rain, and clears the Air.

October hath xxxi Days.

Signs of the Wind changing are these following.
 When the Sun rises with many pale Spots appearing in
 its Orb, and part of it hid in a Cloud, the Wind (in
 what Point it be) will soon turn to the South.
 When the Wind has been settled 24 Hours, or more,
 in any of the full Points, as N. E. W. or South.

Astronomical Observations.

We have lately
 had a Square of Sa-
 turn and Mars, we
 now have a □ of ♄
 and ♂, from ☿ and
 ♄. Multitudinem ma-
 li & ejus durabilita-
 tem; a Multitude of
 Evils will suddenly
 follow The Impe-
 rial Territories is
 now under some Dif-
 ficulties, and several
 Princes of Germany at
 a Stand. The ♀ of
 ♄ and ♂ from ♄
 and ♄ shews, that
 all are not yet quiet
 in the North, but
 that Poland still la-
 bours under Sorrows
 and Tribulation.

November hath xxx Days.

When it begins to turn; it will not settle till it comes to the opposite Point as from North to South, and so from full East to full West, and so of the angular Points, as from the North East to South West

Let the Wind be in what Quarter it will, upon the New or Full Moon it presently changes.

Astronomical Observations.

The Aspects in this Month are but few. 6 and those not very 20 material. The 8 o the ☉ and ♄ shews, that some Person of no mean Quality may * soon expect some Cu- 14 tastrophe. Many Persons that lately ☐ thought themselves o very secure are now △ brought under E- 8 gination. It is very meet, that such Persons as will engage 8 themselves in trea- 10 cherous and rebellious Actions, should perish in their Enterprize. △

December hath xxxi Days.

When the Generality of the Clouds rack, or drive
with the Wind, the Wind is flagging, and soon changes

If you with Care the setting Sun survey.

When down the Steep of Heaven he drives the Day;

If fiery Red his glowing Globe descends,

High Winds and furious Tempests he portends.

I. T.

I. *The INTRODUCTION.*

I Have for some Years preceeding been endeavouring to justify the Truth, Legality, and Usefulness of *ASTROLOGY*, with an Intent to instil a good Opinion thereof into the Minds of young Virtuofos, and to irritate them to look into the Fundamentals thereof; which if done with that Integrity and Application as is necessary, they will find most excellent Delight and Satisfaction in their Pursuit. Certainly, the Consideration of these Truths prevailed so much upon the Minds of the most learned Men in ancient Days, that they imploy'd their most precious Hours of Study in Confirmation of what their Predecessors had before deliver'd; adding themselves the more freely to this Study, for that they saw it was asserted and esteem'd by the most pious Divines. *Damascene* saith, *Alios atque alios Planetas. diversas complexiones, habitus, & dispositiones in nobis constituere.* *Tho. Aquinas* hath also embraced the same Belief, citing the fore-named Author, and confirming this Doctrine by the Comparison of a Physician, who is able to judge by the Complexion and Temperament of the Body, as by the immediate Causes of the Subtilty of the Understanding: In like manner, saith he, may an Astrologer judge of it, by the diverse Motions of the Stars, as by Causes also, though more remote. He adds farther, that it is true, which *Ptolemy* affirms of the Planet Ψ ; that if at the Nativity of a Child, it be found in one of the Houses of Ψ , he will have an acute, clear Wit: And at last, this Learned Doctor concludes, That Astrologers are very seldom out in their Judgment so far as concerns the Manners of Men; for we are, saith he, to believe our Senses and Experience. There have very few Ages passed that have not produced some great Personage famous in Astrology; nor will any ever be able to find (whatever *Picus Mirandulus* says to the contrary) that among so many Astrologers that are spoken of in History, one hath been reproved, if he no more than observed the plain Rules of Astrology, which Nature hath delineated, leaving us the proper Freedom of our Wills, as our Religion teacheth us, for then Astrology is good and allowable.

Astro-

COLEY's *Astrological Observations*, 1735.

Astrological Predictions, as Sir *Christopher Heydon* says, are deduced from determinate Causes to their Effects, so some Events follow always of Necessity, and of such they pronounce infallibly, as of Eclipses, and the like, all the contemplative Part of this Art, concerning the Motions and Configurations of the Planets being demonstrative. In other Cases the Effects are not absolutely necessary, but yet are for the most Part true, and seldom fail. For pre-supposing that the Matter or Subject, whereof the Astrologer speaketh, be convenient and well-disposed, there is no doubt but what they conclude, by the Position of Heaven, will come to pass. As it is not simply necessary that Fire should heat Water, yet if the Fire be applied after a due Manner, it will, and must necessarily work upon the Water; and, after the same Manner do Astrologers, by the Consideration of the Stars, pronounce of the Constitution of the Air, of the general Accidents of the World, of the Temperature of the Body, of the Qualities of the Mind, and the like in Nativities; neither do they meddle at all with rare Contingents, or such as have an indifferent respect to the Opposites, as depending upon unknown or indeterminate Causes, which may or may not happen.

II. *Observations upon the Influences of the Planets at the Times of the Sun's apparent Ingress into the Equinoctial and Tropical Signs, this present Year 1735.*

EVERY Author has a right to dispose the several Parts of his Works in what Order and Form he pleases, but it's decent to observe Method; we Writers of Almanacks must treat of each Month in order as they follow one another, or we shall run into Confusion, so also for the several Quarters, but then we are at Liberty whether we will put our Considerations of the Quarters before the Kalendar, as Mr. *Lilly* and some others used formerly to do, or after it, as is now usually done; and so in treating of the several Quarters it is not necessary we should begin with the Spring-Quarter any more than with the Winter-Quarter, as we formerly used to do in this Almanack, and as several yet do, though now and for some Years past we have made the Spring the Epocha of our Judgment, and that for these Reasons, viz. 1. The

COLEY's *Astrological Observations*, 1735.

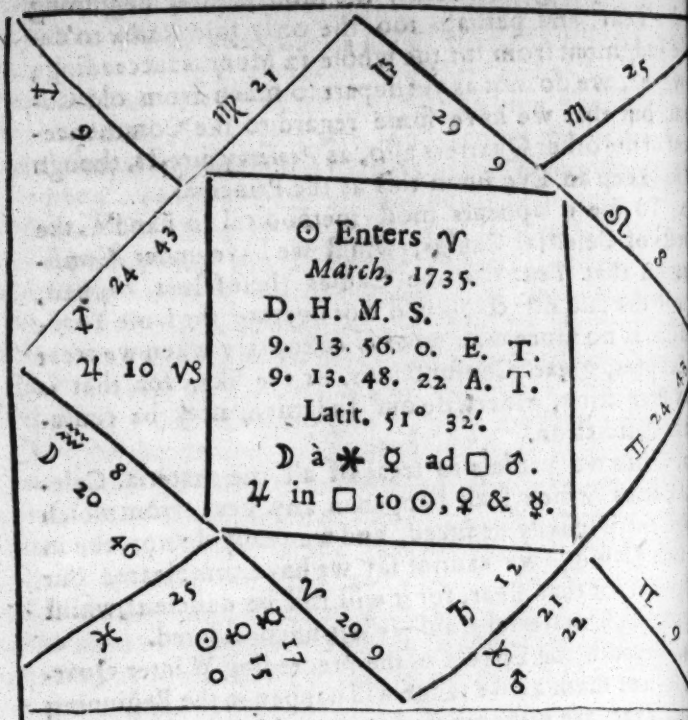

5. The Spring is certainly the most natural Beginning of the Year, and perhaps too the only sole *Radix* to deduce Judgment from for the whole 12 Months succeeding; however, we do not as yet depart so much from old Custom, but that we have some regard to the Commencement of the other Quarters also, as *Ptolemy* directs, though I still keep an Eye upon this as the Principal.
6. To me it appears most methodical to handle the Effects of Celestial Causes, whilst we have under Consideration that Year that the Causes themselves happen, though the said Effects should not operate the same Year; and this is no more than what is customary when we treat of Eclipses, great Conjunctions, or the like, for that is my Prediction, otherwise our Judgment may be censured as Postdiction.
7. When we profess to treat of all the material Celestial Causes which shall happen in any Year, from which Judgment is usually deduced, and we really do not take in such Causes, we cannot say we have compleated our Judgment for that Year, for it will still be deficient, whilst one such material Cause is left unconsidered.
8. Because the Effects of the preceeding Winter-Quarter, such of them as we judge will happen in the Beginning of this Year, are remembered in those Months that we expect they will be manifested in. Thus I have given you Reasons for changing the usual Method of this *Prog.* though I confess it is a Matter altogether indifferent, and which every one have a Right to use his own Liberty: Hence then, without further Preamble, I proceed to consider first,

Of the Spring Quarter,

Which this Year commences on *Monday* the 10th Day of *March*, at 56 min. after 1 in the Morning, according to equal Time, but according to apparent or true Time at 48 min. 22 sec. after 1 in the Morning, when the A. of the MC. is $207^{\circ} 5' 30''$, and Cusp $29^{\circ} 9' \text{♊}$ A. of the Ascend. $297^{\circ} 5' 30''$ and Cusp $24^{\circ} 42' \text{♋}$ The Δ is in the last Decade of ♊ in $\square$ to ♈ and ♊ in ♈ and in ♈ to ♋ and ♋ in ♋ , and they both in $\square$ to Lord of the Ascendant in the Sign ♋ . All which, other Particulars, is represented in the following Table.

The

COLEY's *Astrological Observations*, 1735.

The Planets are all under the Earth at the time of the Ingress, which shews great Obscurity in the Councils and Designs of Princes and States. A great Disturber of the late happy and peaceable Disposition of Affairs in Europe does now appear in a Hypocritical Vizard, and seems very intent in listening to Proposals of Peace; and well would it be for that Prince, were his Intentions as sincere, as, in a little time, they will appear to be deceitful. Jupiter Lord of the Ascendant, and is in the Ascendant, but out of all his essential Dignities, and afflicted by the quadrante Aspect of the *Sun*, *Venus*, and *Mercury*, which denote the dissolving of Friendships, Societies, Leagues, Covenants, and Articles. In those Countries subject to ♌, ♏, and ♍, viz. *Spain*, *Hungary*, *Bohemia*, *Italy*, *Germany*, *France*, *Poland*, &c. these, and many other Countries and Cities in *Europe*, are all subject to the Lash, to popular Tumults.

COLEY's *Astrological Observations*, 1735.

Tumults, Insurrections and Pestilence; *Spain* and *Italy* in particular shall be harass'd by domestick Broils, foreign Invasions, and sudden and violent Accidents; the angry Stars have, and will still continue for some Time longer to shed their dire Influence amongst them, War, Discord, and Fury, Fraud, pale Murder, cruel Consumptions, and armed Madness are attendant on those unhappy Nations. In the Month of *February*, on the 19th Day, a Conjunction of h and δ in D , a Sign in which they are both perigrine, and is a very ill meeting of them to those Places and People they have Influence upon, which are under D , IX , XII , and L , as *Russia*, *Poland*, *Sweden*, *Italy*, *Rome*, &c. It signifies great Calamities to befall all or some of these Places, as Oppressions, Tyranny, Persecutions and rising of Sects, Schisms, and Confusion in the Church, rising of Buildings, Destruction of Cattle, and sordid and inhuman Cruelties. The *Turks* seem to be spirited up to invade the Territories of some *Christian* Princes, but the Stars bespeak them no good Success; they will have Work enough upon their Hands from another Quarter, to the great Mortification of their Anti-Christian Allies and Confederates. The σ of ϕ and δ in ψ , *England's* Ascendant, is of eminent Signification, and shews, that as great Felicity and Honour do attend this Nation as any other Nation in *Europe*, and that our great Men at the Helm of Affairs are busily employ'd in negotiating Matters of great Consequence, in order to terminate the Divisions between contending Powers. It will be well if *Ireland* escape impending Mischiefs, the σ of h and δ in D bodes them no good. The Ascendant in this ingressional Scheme is nearly the same with the degree of the great σ of h and U in 1722, under whose Influence we are still, and shall be 'till the next meeting of those two Planets, which will be in *August* 1742. As to the Effects of this σ I gave some Hints thereof in my *Merlinus Anglicus* for 1723; and then I also took notice that the material Signification thereof would be obscured for a time, or not break out 'till the latter Part of the time determined by the Influence thereof, which time we are now arriv'd at, and must, from this Concurrence of Configurations expect to hear of such Actions in the World I then pointed at, and *Analogous* to what is above delivered.

III. Of the Summer Quarter,

Which this Year commences on *Wednesday* the 11th Day of *June*, at 1 in the Morning, when 14 Deg. of ν culminates, and 4 Deg. of δ ascends; the $\odot$ is 18 Deg. of $\odot$ departing from the $\odot$ of δ , and applying to the $\odot$ of δ , they being all in the 4th House in the Sign $\odot$, and opposed by ψ Retrograde in the 10th House. *Venus*, Lady of the Ascendant, is in *Leo*, in the 5th House, and η is in the Ascendant in 23 Deg. of δ ; it is very remarkable that the Planets are all out of their essential Dignities, weak and debilitated, the $\odot$ only excepted, and she is closely besieged between δ and η , and also that the Ascendant is nearly the same with the Degree of the late $\odot$ of η and δ in *February* last; and indeed this is, in all respects, a violent Ingress, and stimulates great Infelicity to diverse Parts of the World; the Northern Parts of *Europe* will be grievously afflicted by intestine War, Malice, and civil Discord, of which it is to be fear'd the *Turks* will make an Advantage. Some Nations also in the Southern Parts of *Europe* will be greatly distress'd by foreign Invasions, Depopulations and Bloodshed, of which kind of Afflictions *Spain* and *Italy* are like to drink a large Draught, and it will be well if we keep free from a raging Sickness. On the 23d Day of *May* ψ and δ were in Opposition from ν and $\odot$, an Aspect of no good Signification to the Ecclesiastical Order; it shews great Contest and Disputes about Religion and Rights, and not unlikely but we shall hear of some bloody *Popish* Persecution, either design'd or really committed in some Country beyond Sea, but I think only design'd, and that the Contrivers thereof receive some great Blow.

IV. Of the Autumnal Quarter,

Which commences on *Friday* the 12th Day of *September*, at 8 min. past 2 in the Afternoon, when 4 Deg. of ν culminates, and 29 Deg. of γ ascends; the $\odot$ is near the Cusp of the Ascendant, departing from the $\square$ of δ , and applying to the $\square$ of the $\odot$, $\odot$ of ψ , and $\square$ of δ . Here are as violent Positions as any preceding, and such as will co-operate with those at the former Ingresses.

COLEY's *Astrological Observations*, 1735.

1735. Ingresses, and bring to light Matters of very great Consequence. Many notable and superlative Actions, not only in *England*, but in most Kingdoms and Countries in *Europe*; great Debates about Civil Rights and Liberties; some shew of Justice there may be on the Sides of the Male-Contents, or Fomenters of Sedition, but such their Pretensions are only imaginary, frivolous, and ill-grounded, tending to Corruption of Manners, Breach of Charity, and the exciting Mens Minds to Discontent and Rebellion.

V. Of the Winter Quarter,

Which commences this Year on *Thursday* the 11th Day of *December*, at 31 min. past 5 in the Morning, when 22 Deg. of M culminates, and 28 Deg. of M ascends. The $\odot$ is in 28 Deg. of H , departing from the $\star$ of H and applying to the $\square$ of the $\odot$. *Saturn* and *Mars* are in Opposition from S and m , and h and v in Δ from S and vs . From the Consideration of which, and other Configurations, I conclude that this Quarter will be attended with very considerable Counsels and Consultations, and at present Matters seem to be in a hopeful Way of Conclusion; and yet it is probable we may hear of Clamours and Accusations brought against some great Man. We are all too apt to seek Revenge, which unreasonable Passion often involves us in the same Difficulties that we seek against our Adversaries. May the God of all Power, who hath hitherto been so gracious to these Nations, still continue to direct our Superiors in the Management of those weighty Affairs that are now before them.

VI. Of the ECLIPSES.

There will be Four Eclipses this Year, two of the Sun, and two of the Moon, and but one of them visible to these Islands.

The first is an invisible Eclipse of the Moon, on the 11th Day of *March*, near 11 in the Forenoon.

The Second is an invisible Eclipse of the Sun, on the 11th Day of *April*, at 11 at Night.

The Third is a small, visible Eclipse of the Moon, on Monday the 21st Day of *September*, beginning the 20th Day at a Quarter after Midnight; the Middle is at half

and

Ingresses,

COLEY's *Astrological Observations*, 1735.

an Hour after 1 in the Morning of the 21st Day, when it will be near half eclipsed on the lower Part, and the End will be about a Quarter before 3.

The Fourth, and last Eclipse, is of the Sun, on the 5th Day of *Octob.* about 3 in the Morning, therefore invisible.

The Third Eclipse will chiefly affect these Regions of the Earth, it falls in γ , a Sign of the fiery Triplicity, and at the Middle thereof δ , another Sign of the same Trigon ascends, which denotes the Death or Exile of a King or Prince, loss of Cattle, great Heats, Wars, Mutations, and Scarcity of the Fruits of the Earth.

ADVERTISEMENT S.

ARTIFICIAL TEETH set in so firm as to eat with them, and so exact, as not to be distinguished from Natural. They are not to be taken out at Night, as is by some falsely suggested, but may be worn Years together: Yet are they so fitted, that they may be taken out and put in, by the Person that wears them, at Pleasure; and are an Ornament to the Mouth, and greatly helpful to the Speech. Also Teeth cleaned and drawn, by *John Watts* and *Samuel Rutter*, Operators, who apply themselves wholly to the said-Business, and live in *Raquet-Court, Fleet-street, London.*

STEEL Trusses for Ruptures, Bag-Trusses for fixed Tumours, Back-Irons, and other Instruments for the Lame or Crooked, by *Peter Bartlett*, Steel-Truss-maker to the Chest at *Chatham*, for the Help of his Majesty's Seamen, at the *Golden Ball* in *St. Paul's Church-Yard*, near *Cheapside, London.* Persons in the Country sending their Bigness, and on which Side the Rupture is, may be supplied with the Trusses, and proper Directions.

His Mother, *Mrs. M. Bartlett*, at the *Golden Ball* in *Fleet-street*, near *Fleet-Bridge*, is skilful in this Business to her own Sex.
